

Group Members	Contribution
Florence Kabeya	• I implemented probability distributions with normal distribution(Part 1) • Implemented the second iteration in the Gradient descent manual calculations(Part3).
Izere Kerie	• I demonstrated the application of Bayes' Theorem on weather forecasting.(Part 2) • I worked on a function to compute the marginal probability. • I worked on the case scenario of high humidity. • I also worked on the third iteration of manual calculations. (Part 3)
Ganza Didier	• I did Part 3 of Gradient Descent Manual calculations(iteration 1) • I worked on the Part 4 of converting the gradual descent calculation into code(Python)
Tracy Murenzi	• I demonstrated the application of Bayes' Theorem on weather forecasting. (Part 2) • I worked on the function to compute the posterior probability using Bayes' Theorem. • I worked on the case scenario of not high humidity . • I also worked on the fourth iteration of manual calculations. (Part 3)
